<u>Amendments t the Claims</u>

This listing of claims will replace all prior versions and listings of claims in the above-identified application:

<u>Listing of Claims</u>

Claims 1-59 (Cancelled).

Claim 60 (Currently Amended): A system for managing, orders received from a first shop and orders placed with a second shop comprising:

communication means for communicating data indicating statuses of orders received, and orders placed; and

display control means for controlling <u>to</u> display <u>simultaneously</u> ~~of~~ a first combination of a first group of management items which indicate statuses of order process from order determined to acceptance and each number of the orders received <u>corresponding to each of the statuses</u> of the first group of management items, the first group <u>of the management items displayed</u> under a first icon which is for discriminating the first group of management items as the orders received, and a second combination of a second group of management items which indicate statuses of order process from order determined to acceptance and each number of the orders placed <u>corresponding to each of the statuses</u> of the second group of management items, the second group <u>of the management items displayed</u> under a second icon which is for discriminating the second group of management items as the orders placed, <u>in the case where the orders received and the orders placed are existence,</u>

<u>wherein said display control means displays simultaneously the first icon and the first combination as a pair, and displays simultaneously the second icon and the second combination as a second pair, in a case where the orders received and the orders placed are existence,</u>

2

wherein said display control means prohibits the displaying of the first combination to be displayed except for the first icon, in a case where the orders received is not existence, and

wherein said display control means prohibits the displaying of the second combination to be displayed except for the second icon, in a case where the orders placed is not existence.

Claim 61-66 (Cancelled).

Claim 67 (Currently Amended):   A method for managing, orders received from a first shop and orders placed with a second shop comprising:

a communication step of communicating data indicating statuses of orders received, and orders placed; and

a display control step of controlling to display simultaneously a first combination of a first group of management items which indicate the statuses of order process from order determined to acceptance and each number of the orders received corresponding to each of the statuses of the first group of management items, the first group of the management items displayed under a first icon which is for discriminating the first group of management items as the orders received, and a second combination of a second group of management items which indicate statuses of order process from order determined to acceptance and each number of the orders placed corresponding to each of the statuses of the second group of management items, the second group of the management items displayed under a second icon which is for discriminating the second group of management items as the orders placed, in a case where the orders received and the orders placed are existence,

3

wherein said display control step displays simultaneously the first icon and the first combination as a pair, and displays simultaneously the second icon and the second combination as a second pair, in a case where the orders received and the orders placed are existence,

wherein said display control step controls prohibits the displaying of the first combination to be displayed except for the first icon, in a case where the orders received is not existence, and

wherein said display control step prohibits the displaying of the second combination to be displayed except for the second icon, in a case where the orders placed is not existence.

Claim 68 (Cancelled).

Claim 69 (Currently Amended): A storage medium storing program modules of a method executable on a computer for managing orders received from a first shop and orders placed with a second shop, wherein the program modules include:

a module for communicating data indicating statuses of orders received, and orders placed; and

a display control module for controlling to display simultaneously a first combination of a first group of management items which indicate statuses of order process from order determined to acceptance and each number of the orders received corresponding to each of the statuses of the first group of management items, the first group of the management items displayed under a first icon which is for discriminating the first group of management items as the orders received, and a second combination of a second group of management items which indicate statuses of order process from order determined to acceptance and each number of the orders placed corresponding to each of the statuses of the second group of management items, the second group of the management items displayed under a second icon which is for

4

discriminating the second group of management items as the orders placed, <u>in the case where the orders received and the orders placed are existence,</u>

<u>wherein said display control module displays simultaneously the first icon and the first combination as a pair, and displays simultaneously the second icon and the second combination as a second pair, in a case where the orders received and the orders placed are existence,</u>

wherein said display control module prohibits the <u>displaying of the</u> first combination t̶o̶ b̶e̶ d̶i̶s̶p̶l̶a̶y̶e̶d̶ except for the first icon, in <u>a</u> case where the orders received is not existence, and

wherein said display control module prohibits the <u>displaying of the</u> second combination t̶o̶ b̶e̶ d̶i̶s̶p̶l̶a̶y̶e̶d̶ except for the second icon t̶h̶e̶ d̶a̶t̶a̶ i̶n̶d̶i̶c̶a̶t̶i̶n̶g̶ t̶h̶e̶ s̶t̶a̶t̶u̶s̶ o̶f̶ t̶h̶e̶ s̶e̶c̶o̶n̶d̶ g̶r̶o̶u̶p̶ o̶f̶ t̶h̶e̶ m̶a̶n̶a̶g̶e̶m̶e̶n̶t̶ i̶t̶e̶m̶s̶ i̶n̶c̶l̶u̶d̶e̶d̶ i̶n̶ t̶h̶e̶ s̶e̶c̶o̶n̶d̶ i̶c̶o̶n̶,̶ a̶r̶e̶ n̶o̶t̶ d̶i̶s̶p̶l̶a̶y̶e̶d̶, in <u>a</u> case where the orders placed is not existence.

Claims 70–96 (Cancelled).
